

BRAND & PRODUCT STYLE GUIDE

We'll check for you.

The complete visual system behind checkitforme.com — brand mark, color, type, components, and the live store-logo treatment, pulled directly from production.

Dark-first Mobile-native Inter checkitforme.com

01 — BRAND

The mark

A circular green checkmark with a check-shaped negative-space cutout — used as the **C** in "Check". The right arm of the cutout opens through the right edge of the circle. Geometry is locked.

Glow version
Dark backgrounds only - effect layer

Flat / production
SVG, print, favicons, app icons

Primary wordmark — the mark replaces the "C". Maintain clear space of at least **1x the mark height** on all sides.

DO

- Use **#4CF286** as the base fill
- Keep the circle & cutout proportions locked
- Use glow only as an effect on dark backgrounds
- Export on **#08090D** or transparent

DON'T

- Recolor the mark to another green
- Alter the cutout angle or circle geometry
- Bake glow into the geometry
- Place flat mark on a busy, low-contrast background

02 — COLOR

Palette & tokens

Two greens coexist: the brand-pack **#4CF286** for the mark, and the slightly cooler UI green **#4ADE80** that drives every interactive surface in-product.

BRAND MARK GREENS

Primary #4CF286	Highlight #73F18F	Glow #19B145	Brand bg #88979D

UI SURFACE & INK

--bg #0C8C12	--sheet #1A1A24	--terminal #BABABE	--muted #68687B

FUNCTIONAL ACCENTS

--green #4ADE80	--yellow #F8BF24	--red #EF4444	--purple #A788FA

Purple is neutral secondary chrome — the **same on every vertical** so the sites feel like one product family. Brand identity comes from the logo, the accent word, and the slider fill, never from recoloring controls.

PER-VERTICAL ACCENT - --ACCENT

Each vertical injects ONE accent at serve time. It drives the **call button**, the **selected-store border**, the hero accent word and the account-pill dot. **Pokémon = gold #FFC805**. Green stays fixed for success / verdict and the slider — accent never recolors those.

03 — VERDICT TONES

The four answers

Every check resolves to one of four states. Each owns a hue and a top-down page wash that floods from the status bar into the result. Color lives only in the pill, the title word, and the wash — never the whole box.

 They have it. 2 booster boxes on the shelf, \$161 each. --rv-in #4ADE80 #26644B	 Sold out. Nothing on the floor or in the back today. --rv-out #EF4444 #6b2427
 Couldn't confirm. Line went to voicemail — no charge applied. --rv-unk #F8BF24 #6c5419	 Truck Thursday. Clerk says new shipment lands this week. --rv-soon #F59E0B #6e490f

04 — TYPOGRAPHY

Inter, end to end

One family across the entire product. Headlines lean on weight 900 and tight negative tracking; body sits at 400–600. A monospace face is reserved for the live call step-log only.

Hero 900 · 52/-1.6	They have it.
Section 900 · 34/-0.8	Find your store
Title 800 · 19.5	Costco Wholesale — Seattle
Body 400 · 15	We phone the store, ask a real person, and text you back the verdict — usually in under three minutes.
Eyebrow 800 · 11 · caps	Ⓞ FIND YOUR STORE
Step-log 500 · 13 · muted	It's ringing... 1s We've connected... 2s Associate answered ✓

06 — STORE LOGOS

The logo slot

~94 real chain logos every drop into one fixed tile — a **dark embossed gradient** slot, 52px, 15px radius. Every logo, colored icon or white wordmark, sits on that dark tile: **no white plates**. Name-only stores fall back to a two-line wordmark, never an invented logo. The selected row takes the **accent** border.

	CVS Mulholland Drive • 2.1 mi · Open	✓

A FEW OF THE CHAINS — ALL ON THE DARK TILE

--	--	--	--	--

07 — RESULT ANATOMY

The result & the call

A finished check is one boxless, top-toned screen: verdict pill → headline → green primary, then a **single call timeline** — one green line with three dots (the call roll-up, the conversation, the final status). Steps read in muted grey; the conversation hangs off the line as **Associate** / **Check AI** bubbles.
